

CLAIMS DATABASE ANALYSES

REAL-WORLD EVIDENCE ON TREATMENTS AND DISEASES

Claims database analyses can provide insight on pharmaceutical and medical services utilization associated with a specific diagnosis/disease or treatment in routine clinical practice.

HOW PERIPHARM CAN HELP YOU?

Database analyses can provide a wide range of real-world evidence on treatments and diseases to support market access and marketing initiatives. PeriPharm has a recognized expertise in administrative database analyses, most notably with the prescription and medical services database of the Régie de l'assurance maladie du Québec (RAMQ).

POTENTIAL ANALYSES

Characteristics of diseases, patients and treatments

Patients' demographics, comorbidities, and treatment characteristics, including number of users, treatment duration, treatment cost and prescribers' specialty.

Health care resource utilization and costs

Medical visits (specialists/GPs), medical procedures, emergency visits, hospitalizations and medications.

Treatment patterns pre- and post-launch

Treatment patterns, sequences of drug use, concomitant uses, patterns of use over time before and after new product introduction.

Treatment compliance

Adherence and persistence to treatment and identification of their potential determinants.

WHO WE ARE

We believe that the best available therapies should be accessible to those who need it. That's why at PeriPharm, with the scientific rigor of academia, we are dedicated to facilitating market access to our clients' innovative solutions.

Founded in 2003, PeriPharm is a Canadian company with an established expertise in pharmacoeconomics and outcomes research. Our mission is to offer high-quality and diversified services to ensure optimal market access.

WE ARE DISTINGUISHED THROUGH OUR:

- In-depth knowledge of the Canadian health care system and payers' requirements.
 - Rigorous work methods arising from academia to produce high-quality projects.
 - Commitment to our projects and flexibility of our services.
 - Comprehensive repertoire of services offered, including economic modeling, network meta-analyses, real-world evidence, etc.
